Built on Trust. Grown Through Execution.

Since 2016, Bewi's Execution and Tech has been the trusted bridge between West Africa's agricultural producers and international buyers.

Our Story

Bewi's Execution and Tech was founded in Ouagadougou in 2016 with a simple conviction: West African agricultural producers deserve a partner who can turn their harvest into reliable, bankable export contracts. What began as a small sourcing desk for sesame and shea has grown into Burkina Faso's leading agricultural export house, serving buyers across Europe, Asia, the Middle East and the Americas.

Today, our team manages the full chain — from farm-gate aggregation and quality control to customs clearance and container loading — so that every shipment leaves Burkina Faso exactly as specified, on time, every time. It's this discipline, repeated shipment after shipment since 2016, that has made us the #1 name international buyers turn to when sourcing from Burkina Faso.

Our Mission

To give West African producers direct, reliable access to global markets — and to give international buyers a single, accountable partner for sourcing, quality control and export logistics.

Our Vision

To become the reference export house for agricultural commodities across West Africa, expanding our catalogue, our markets and our impact on the communities we source from.

Why Global Buyers Choose Us

Procurement officers in Europe, Asia, the Middle East and the USA trust us for one reason: flawless execution, from farm gate to your port of destination.

Certified Quality Standards

Every lot is inspected, graded and tested before loading. Pre-shipment inspection (SGS / Bureau Veritas on request), phytosanitary certificates, certificate of origin and full export documentation included.

Seamless Export Logistics

Bonded warehousing in Ouagadougou, corridor logistics to the ports of Abidjan, Tema and Lomé, container stuffing supervision and real-time shipment tracking. FOB, CIF, CFR — your Incoterm, our execution.

Container-Scale Volumes

From a single 20ft container to multi-vessel annual contracts. Structured aggregation network across Burkina Faso's producing regions guarantees consistent volumes and stable forward pricing.

Institutional Reliability

Registered export company, transparent contracts, secured payment instruments (L/C, CAD, escrow). We build multi-year supply partnerships, not one-off trades.

Our Export Catalogue

Bulk agricultural raw materials, harvested in Burkina Faso and neighbouring West African origins, prepared to international export grade.

Product	Variant	HS Code	MOQ	Packaging
